

OFFICE 365 MIGRATION WITH AP ELEMENTS FLY

FAST AND EASY MIGRATION

In a hurry of moving to Microsoft Office 365? Painstakingly understand your current IT environments like SharePoint on-prem, Exchange on-prem, Box, Dropbox, and file shares? Limited budgets or IT resources? Let AP Elements do the heavy lifting for you. AP Elements Fly is the fastest Office 365 Migration tool on the market and can help automate your migration project with pre-defined mappings, schedules, and real-time monitor.

THREE STEPS TO LAUNCH

STEP 1 Analyze

Know what's relevant and important, or just collecting dust before your move. Understand potential risks or pitfalls, and improve migration planning.

STEP 2 Migrate

Achieve your desired transformations with drag-and-drop ease. Map, test, schedule, repeat.

STEP 3 Monitor

Track migration progress and validate results.

KEY FEATURES

PRE-MIGRATION ANALYSIS

- **Know your risks.** Identify customized web parts, site templates, web pages, groups, that require updating, mapping, or deleting.
- **Get all the details.** Understand your existing information architecture, data size, users, workflows, site activity levels, and customizations. Export to CSV for deeper analysis.

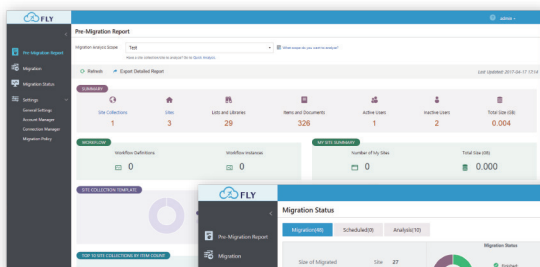

MIGRATE

- **Drag and drop.** Move entire site collections or individual lists and libraries from SharePoint 2007, 2010, 2013, Exchange On-prem, Box, Dropbox, and File Share into Office 365 with drag-and-drop ease.
- **Take only what you need.** Filter based on content properties or metadata to take only what's relevant, leaving behind content that's stale or no longer needed.
- **Transform your data.** Map existing security, properties, metadata, and attributes into Office 365 with user, template, column, and content type mapping.
- **Test it out.** Run test migrations to preview migration outcomes, and make sure your configurations achieve your desired results.
- **Migrate on your time.** Set up a schedule, or migrate in real time.

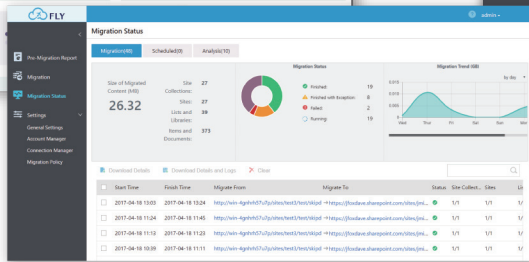

MONITOR

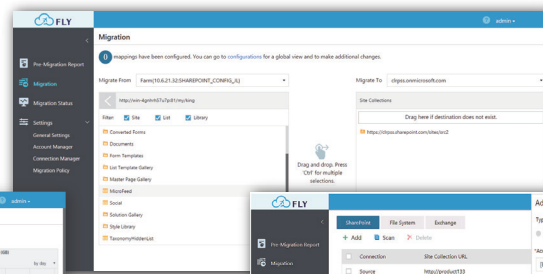

- **Track your progress.** Monitor your migration status and progress on your migration dashboard.
- **Validate your migration.** Report on migrated data volumes as well as site, list, library, and item counts. Understand migration trends across your sources and destinations.
- **Stay in the know.** Send automated emails to stakeholders with detailed migration reports.

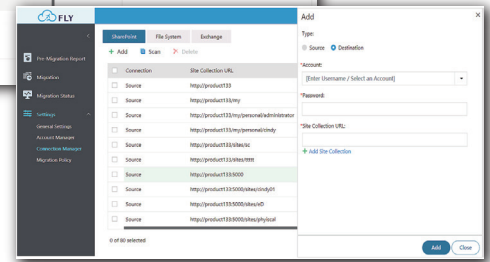

Step 1. Analyze

Step 3. Monitor

Step 2. Migrate
