

AvePoint Partner Portal

for Microsoft Office 365 and Dynamics 365 Managed Services Providers

Accelerate cloud adoption and usage by delivering migration, backup, and management services for Office 365 and Dynamics 365 through a single, SaaS platform. Easily provision, manage, and analyze your customer licenses and usage all in one place, to scale without losing visibility into support tickets and ongoing activity.

AvePoint's dedicated, partner-centric portal is built on AvePoint Online Services, a 100 percent Microsoft Azure-hosted Software-as-a-Service (SaaS) platform that helps companies take advantage of Office 365's benefits – without compromising control. AvePoint Online Services is trusted by over 6 million cloud users, allowing business users, decision makers, and IT administrators to migrate, backup, and manage Office 365 and Dynamics 365 data.

Leverage AvePoint Online Services' powerful capabilities to extend and differentiate your Office 365 and Dynamics 365 managed services offerings. Supported services include:

Office 365 Migration

Remove roadblocks, transform business processes, and get your customers to the cloud quickly. Move file shares, Exchange and G-Suite mailboxes, SharePoint, Dropbox, and more to Office 365.

Office 365 and Dynamics 365 Backup

Help your customers rest easy by offering automated backup for Groups, Teams, sites, Public Folders, mailboxes, entities, and records, as well as granular, item-level restore.

Office 365 Management

Centrally manage, restructure, and report on your customers' Office 365 environment through a central interface. Instantly detect and correct inappropriate changes to permissions and settings across Office 365.

“ No other solution gives us the capability to operate these kinds of managed services on behalf of our clients.

David Huseonica, *President and CEO, Cloud | AG*

”

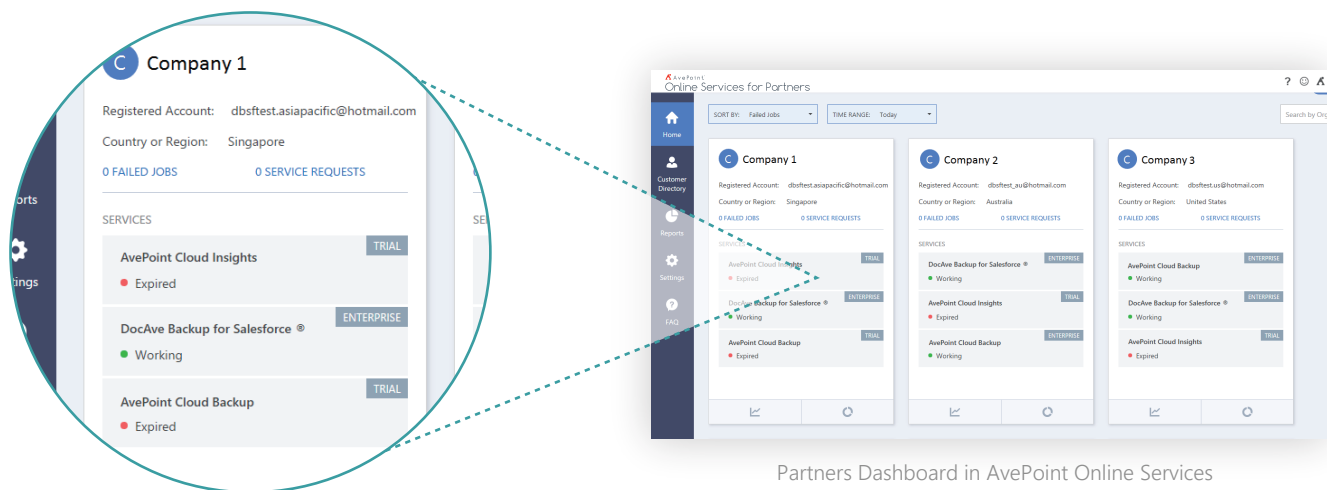

Configure, Manage, Backup, and Report

- Control Office 365 permissions, external sharing, configurations, and content.
- Meet backup and restore SLAs for Office 365 and Dynamics 365 with ease by recovering entire sites, entities, mailboxes, Public Folders, Groups, Teams, OneDrives, or individual items.
- Accommodate evolving business needs by easily reorganizing and replicating content, configurations, and site elements within or across Office 365.
- Preserve an offline copy of a user's data after he or she is removed from Office 365.
- Gain valuable insights with customizable reports to monitor adoption and usage for Office 365.
- Automate policy enforcement, ensuring all actions or changes in Office 365 fall within your organization's defined governance policies.

Simplify Customer Management through AvePoint Partner Portal

- View, invite, and manage your customers, even activate services with 2-step setup
- Tag and organize your customers for simplified billing and policy management
- Quickly gain insight into open support tickets, job status, and requests
- Incident management alerts you according to configured threshold limits for skipped items or job errors
- Centrally manage and view customer licensing, even manage customer billing profiles

Partners Dashboard in AvePoint Online Services

“ Utilizing cloud-based collaboration technologies such as Office 365 and Service-Point365 managed by AvePoint Online Services allows us to access data more reliably and work more efficiently than ever before, which ultimately benefits our customers.

Brian Newsome, *Co-Founder and Executive Vice President, Albion Scaccia*
