

# SLACK TO TEAMS MIGRATION WITH AP ELEMENTS FLY

## THE SWIFTEST, SIMPLEST MIGRATION AROUND

It's a bird, it's a plane...it's FLY. AP Elements has one of the fastest tools on the market to consolidate and migrate Slack to Teams. If you're looking to clean out or clean up data, are on a tight timeline, or an even tighter budget, FLY can help. We can automate your migration project with pre-defined mappings, schedules, and a real-time monitor. With our super-light install package, you'll be ready for takeoff in a jiffy!

## RESOLVE YOUR MIGRATION SITUATION IN THREE EASY STEPS

### STEP 1 Analyze

Know what's relevant and important, or just collecting dust before your move. Understand your existing information architecture to avoid potential risks or pitfalls, to improve the migration planning.

### STEP 2 Migrate

Migrate all Slack content, including channels, users, files, and more, to achieve your desired end goal with drag-and-drop ease. Then filter, map, configure, import, and schedule the move, or just migrate in real time.

### STEP 3 Monitor

Track migration status and progress on the dashboard, validate your migration, generate reports that highlight actions taken, and always be in the know with automated updates sent directly to stakeholders.

# KEY FEATURES

## PRE-MIGRATION ANALYSIS

- **Get all the details.** Understand your existing information, total number of channels, public channels, private channels, and data size. Export to CSV for deeper analysis.

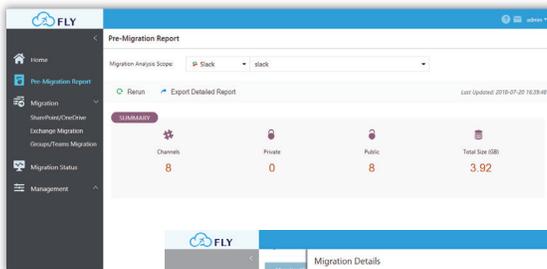

## MIGRATE

- **Transform your data.** Manually map channel names and email addresses.
- **Migrate on your time.** Set up a schedule or migrate in real time.

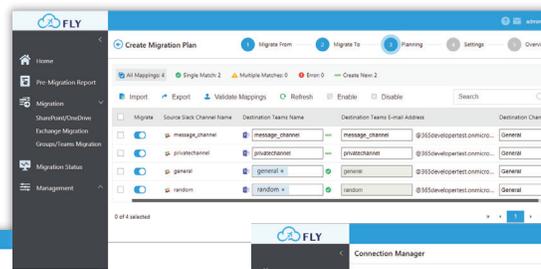

## MONITOR

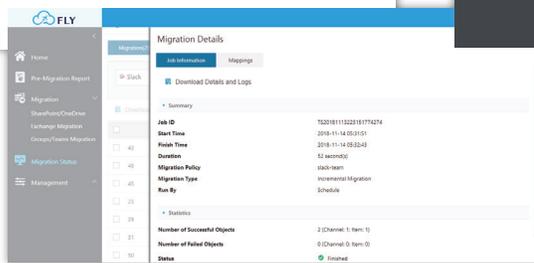

- **Track your progress.** Monitor your migration status and progress on your migration dashboard.
- **Validate your migration.** Report on migrated data volumes as well as number of channels that successfully migrated. Understand migration trends across your sources and destinations.
- **Generate migration analysis.** Support downloading executive reports on job count and status, object count and status, and migration trend analysis to highlight the actions taken during the migration.
- **Stay in the know.** Send automated emails to stakeholders with detailed migration reports.

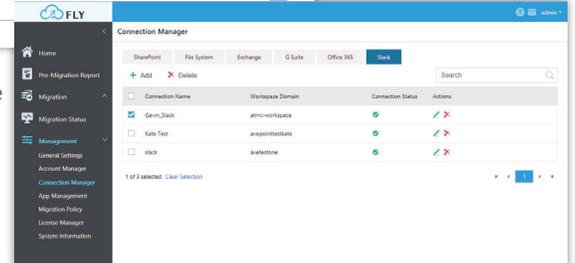

Step 1. Analyze

Step 2. Migrate

Step 3. Monitor
